

Custom Die Cut Guide

Prepare 3 separate files.

One file will include your final design.
Include a die cut line separated from the printed design and save as 2 files.

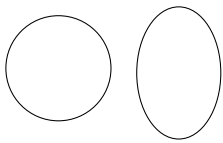

Please make sure to include the final size of the die cut in your order.

- * - Files Should include .125" bleed.
- Important elements should be kept at least 1/8" away from the edges of the card.
- **Tearing along the edges** may be noticeable on the backside if there is a dark color. We recommend keeping the back light or ordering soft touch to prevent this

Custom Cut Categories

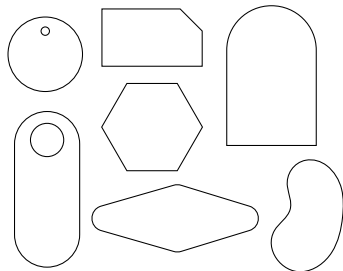

Round/Oval

The most basic shapes.

Simple

A step after round/oval. These can include hole punches, flat, and/or sharp edges.

Detailed

These include complicated shapes, scalloped edges, and tight notches.
