

Spot UV/Raised Print Guide

White Spot UV/Raised Print

Prepare 3 separate files.

One file will include your final design. For white Spot UV/Raised Print, separate these elements from non-Spot UV/Raised elements. Turn the white into a different color (or change to a spot color and name it “White”).

Please make sure to include the design intention in the notes section of the order form.

Clear Spot UV has a similar set up, but make sure to specify the design is intended to be clear.

Color Spot UV/Raised Print

Prepare 3 separate files.

One file will include your final design. For color Spot UV/Raised Print, separate these elements from non-Spot UV/Raised elements. Keep as the color in your file.

Please make sure to include the design intention in the notes section of the order form.

- * - Files Should include .125” bleed.
- Important elements should be kept at least 1/8” away from the edges of the card.
- **Spot UV/Raised print elements should be at least .5pt in thickness.**
